Who we are

We have been located in Nice in the Alpes Maritimes since 2007. We have over 30 years' experience in seeking out and supplying electronic components

Our professionalism and serious approach have enabled us to establish partnerships that allow us to supply major companies such as Eaton, Schneider and Teledyne.

We also work in close collaboration with manufacturers of electronic components. This enables us to supply all kinds of parts in a variety of fields: energy, industrial, medical, military and research.

We have been certified ISO 9001, 2015 version, by Bureau Veritas since 2010. Because we deliver an average of 610,000 pieces each year, we are well accustomed to managing large volumes.

What we do ?

We have a database of over 10 million references (and their equivalents by type and brand) that lists risk references and defective and/or counterfeit parts. We supply all types of electronic components (active, passive, obsolete, end-of-life or subject to supply disruption) and connectors.

Our close collaboration with approved ISO 9001-EN9120 certified workshops and maintenance centers in Europe and North America means that we can test, check and certify products so that we can offer them to you in a short space of time.

ELECTRONIC COMPONENTS

ACTIVE :

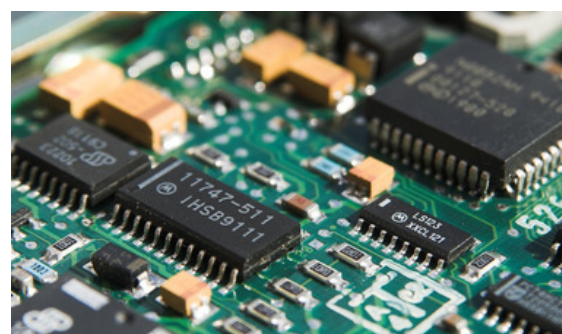

Diodes – Transistors – Thyristors
Printed Circuits – Equipped Printed Circuits

PASSIVE :

Resistors – Capacitors
Potentiometers

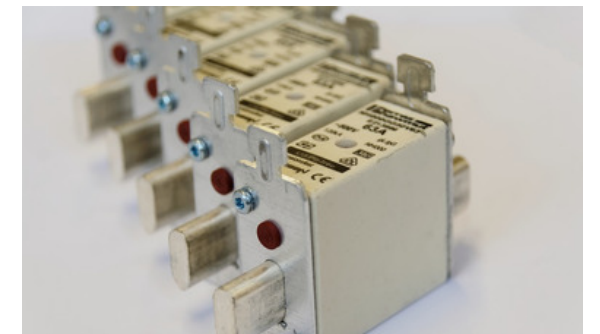

CONNECTIONS

Connectors – Cables
Ducts and Sleeves

ELECTROMECHANICAL

Relays – Fuses – Switches

TRANSFORMERS

ELECTRONIC TUBES

GTO AND IGBT MODULES

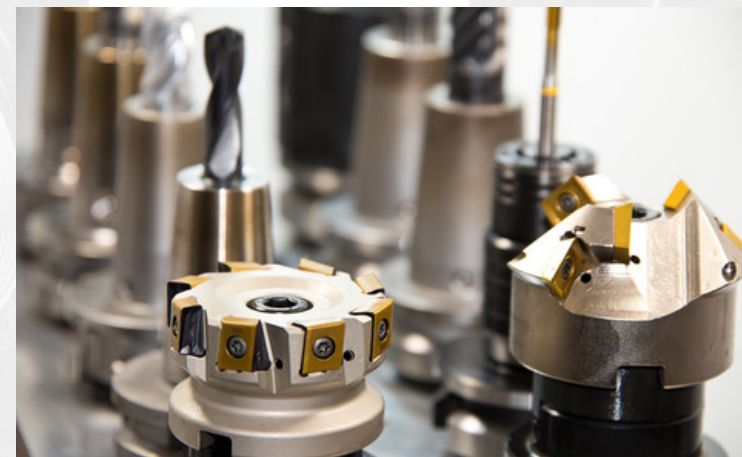

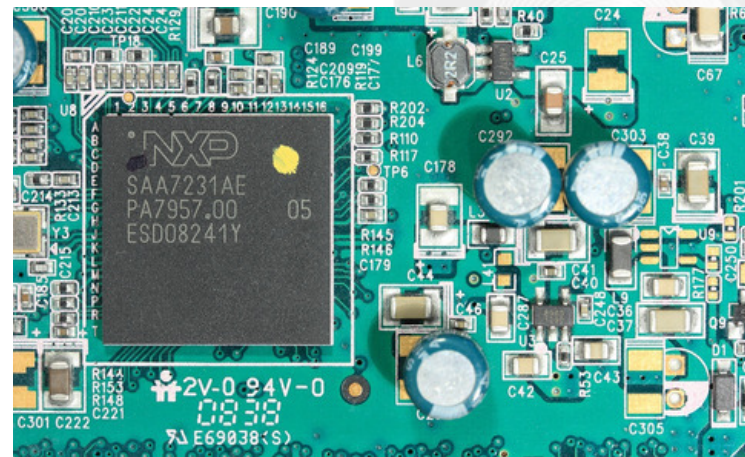

How we work ?

Our objective is to enable you to manage the problems that arise in this sector with confidence.

The electronic component sector is frequently faced with obsolescence issues that make it extremely complicated to supply them.

Our special skills and know-how in the field mean that we can search for the products you need.
If this is not possible, we can use our manufacturing partners to restart dedicated production.

We take your essential requirements into consideration, and do everything we can to ensure that your requests are handled with a positive outcome.

What we guarantee ?

People and ethics are the core of our philosophy. We guarantee that you will have the benefit of the highest standards of quality and reliability in the supply of products.

In order to achieve this, we have established a series of procedures (traceability of parts, certificates of origin, etc.) that enables us to verify that our ongoing commercial transaction is progressing perfectly at any moment.

We update our database, in which we store risk references, defective and counterfeit parts and the names of unqualified suppliers, in real time. This makes it possible for us to comply with our criteria of quality and fitness.

We are attentive to the issues that concern you, and so we have taken out a €9,100,000 Industrial Risk Civil Liability insurance policy with Assurances AXA (which includes installation and removal).
